About PAC

PAC's vision is of an agricultural sector which is private-sector led, technology-driven, entrepreneurial and globally competitive. A transformation of the agriculture sector in this direction is only possible if farmer profitability rises as a result of it. PAC's mission is to drive that transformation. For this purpose consensus and concerted action are needed from key stakeholders such as: growers, governments, the private sector, development partners, the finance sector, academics and consumer groups.

PACE 2024 Objectives

- Celebrate**
the ingenuity, toughness, and hard work of those associated with Pakistan's agriculture sector—first and foremost our farmers but also the best among all stakeholders
- Educate**
all stakeholders associated with Pakistan's agriculture sector about how to realize agriculture's potential to benefit Pakistan's economy and society
- Invest**
in all facets of the agriculture sector of Pakistan for the growth of the Pakistani economy.

Initiative

Pakistan Agricultural Coalition (PAC) is the leading source of new business models for growth in Pakistan's agriculture sector. It is supported by Pakistan's leading conglomerates in business and finance and has forged strong relationships with all stakeholders:

- the farming community
- federal and provincial government circles
- donor institutions
- and academia/international experts

A key theme of the Pakistan Agricultural Coalition's work is to 'connect the dots' to propel the agriculture sector forward.

With the objective of connecting the dots to realize agriculture's potential to contribute to Pakistan's future, Pakistan Agricultural Coalition announces the first "PAC Agri-Connections event on April 24-25, 2024", in Lahore.

AGRI CONNECTION EXPO 2024
